

Free Aphasia treatment over the Summer!

The Multilingualism lab is conducting research about word retrieval in bilinguals with aphasia. We are looking for Spanish-English bilinguals who have aphasia following a stroke on the left side of the brain.

YOU MAY BE ELIGIBLE IF YOU...

- Had a stroke or other brain injury more than 6 months ago.
- Have been diagnosed with aphasia resulting from a brain injury on the left side.
- Speak Spanish and English and were fluent in both languages prior to the brain injury.
- Have access to a computer, camera, and internet.

If you are interested in learning more, please call/text/email Kana Lopez at (510) 358-8801 or klopez77@horizon.csueastbay.edu
